Past Performance

Section 106 Compliance and Consultation -To help Southern Maryland Electricity Cooperative (SMECO) fulfill their Federal Section 106 obligations, AAHA conducted an extensive Phase I and Phase II archaeological survey within the Historic St. Mary's City district. The survey tested an area of over 7 miles within the site of Maryland's first capital and returned thousands of artifacts. AAHA handled all of the liaisons with Historic St. Mary's City and the Maryland Historical Trust for SMECO and brought the project in on time and under budget. "Working with AAHA has been a pleasure! They communicate better than any other contractor I've worked with. They are responsive. They know what to do and who to contact to get stuff done. And, best of all...**they are honest and came in under budget of several of my important projects.**"

- **Tommy Short, Environmental Affairs Coordinate at SMECO**

Cell Tower/FCC Compliance - AAHA has been assisting in fulfilling the requirements of the FCC Nationwide Programmatic Agreement for Review of the Effects on Historic Properties for Certain Undertakings approved by the Federal Communication Commission, working with other historic preservation consultants. "Applied Archaeology and History Associates, Inc. has worked in parallel with me to produce cell tower reviews across multiple states and the District of Columbia. Their staff has helped to ensure that each review is submitted in a timely fashion and is of the highest quality. It may sound trite but they are prompt, courteous, and professional. They provide service with a smile."

- **David A. Berg, Historic Preservation**

When Dealing with AAHA, The Customer Always Receives:

Competence/Subject Matter Experts with the appropriate level of experience and who meet or exceed the professional qualification criteria required by the U.S. Department of the Interior for Cultural Resource Management professionals (36 CFR 61) and are members of the Register of Professional Archaeologists.

Clear and Responsive Communication about the right subjects at the right times to ensure that the project flows smoothly

Efficiency as we work with clients to provide a cost effective yet quality product that will meet the requirements of the various regulatory agencies in a timely manner. AAHA realizes that our client's timescales are often one of the most important factors driving a project.
